

WASEEM HASSAN

AI Engineer

Khairpur, Pakistan (open to relocate — Saudi Arabia) | +92 313 3023539 | waseemhassan7711@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer with 9+ years of overall technical experience spanning enterprise infrastructure and applied Machine Learning, now focused on building and deploying LLM-powered applications and intelligent agents. Hands-on experience integrating LangChain, vector databases, and OpenAI models into production applications, deploying and debugging live ML systems end-to-end, and working with SQL-backed data layers. Currently completing Microsoft's AI-900 (Azure AI Fundamentals) certification to deepen Azure cloud proficiency. Brings a production-reliability mindset from a long systems and network administration background, and is looking to apply that discipline to shipping AI solutions on Microsoft Azure.

CORE SKILLS

Programming	Python (production scripting & ML pipelines), SQL
AI / LLM Engineering	LangChain, Retrieval-Augmented Generation (RAG), OpenAI API integration, multi-agent workflows, prompt engineering
Machine Learning	scikit-learn, XGBoost, regression, classification, clustering, feature engineering
Cloud	Microsoft Azure fundamentals (AI-900 in progress); infrastructure background across enterprise network and systems environments
Data	SQL, relational data modeling, vector databases (FAISS, Chroma)
Deployment & Tools	Docker, FastAPI, Streamlit, Git/GitHub, production debugging

PROFESSIONAL EXPERIENCE

Machine Learning Engineer — Cybriox

2024 – Present

- Design and build end-to-end ML pipelines — from data cleaning and feature engineering through model training and deployment — for client-facing use cases.
- Develop regression, classification, and clustering models, iterating on feature engineering to improve production performance.
- Work with SQL-backed data layers and cross-functional teams to deliver and maintain deployed ML applications.

AI Engineer — Xeven Skills / Codanics

2023 – 2024

- Built and deployed an LLM-powered AI mentor chatbot using LangChain-based retrieval for student-facing interactions.
- Designed a document Q&A system on a Retrieval-Augmented Generation (RAG) architecture over course reference material.
- Developed a multi-document retrieval chatbot enabling natural-language access to structured and unstructured content.

Network Administrator — Sukkur IBA University, Khairpur Campus

2016 – Present

- Manage LAN/WAN infrastructure supporting 250+ workstations and configure Cisco firewalls for critical systems.
- Automate user provisioning workflows using Active Directory and DHCP — a production-operations grounding now applied to reliable AI system deployment.

Visiting Computer Science Instructor — Sukkur IBA University

2017 – Present

- Teach Python programming and cloud computing fundamentals to undergraduate students; supervise capstone projects.

Resident Engineer — IBA Karachi

2015 – 2016

- Maintained network infrastructure and supported end-user hardware.

System Support Engineer — State Life Insurance Head Office, Karachi

2013 – 2015

- Administered Windows Server infrastructure and network security.

AI PROJECTS

Multi-Document RAG Chatbot and AI Agents — Cybriox

Jan 2025 – Jun 2025

- Built a chatbot that reads and answers questions across multiple document formats (PDF, Word, Excel) using a RAG pipeline — directly applicable to AI model and agent integration work.
- Integrated LangChain, vector databases, and OpenAI models to deliver context-aware answers over multi-format document sets.

DiabetesAI — Diabetes Risk Prediction App — *Personal Project*

- End-to-end ML application predicting diabetes diagnosis risk from patient demographic, lifestyle, and clinical data.
- Built with scikit-learn and XGBoost using a schema-aware Pipeline/ColumnTransformer architecture; deployed live with Streamlit.

Live Demo: diabetesaiapp.streamlit.app | GitHub: github.com/Waseem771/DiabetesAI.app

Karachi House Price Predictor — *Cybriox*

- Built and deployed a Streamlit ML app predicting real estate prices from 60K+ Zameen.com listings using a Random Forest Regressor (R^2 0.91).
- Owned the full pipeline: data cleaning, feature engineering, live deployment, and production debugging — relevant real-estate-domain deployment experience.

Live Demo: karachi-house-price-predictor-app.streamlit.app | GitHub: github.com/Waseem771/Karachi_House_Price_Prediction_App

Stroke Risk Predictor App — *Personal Project*

- End-to-end ML project predicting stroke risk from patient health data, covering preprocessing, model training, and deployment.

Live Demo: strokepredictorapp.streamlit.app | GitHub: github.com/Waseem771/Stroke_Predictor_App

CERTIFICATIONS

- AI-900: Microsoft Azure AI Fundamentals
- Google Prompting Essentials
- Gen AI: Beyond the Chatbot

EDUCATION

Master of Computer Science — Shah Abdul Latif University, Khairpur (2023)

B.E. Computer System Engineering — Quaid-e-Awam University of Engineering, Sciences and Technology, Nawabshah (2011)

LANGUAGES

English — Fluent | Urdu — Native

PERSONAL DETAILS

Nationality	Pakistani
Relocation	Willing to relocate to Saudi Arabia; sponsorship required
